Subject: RE: WV's MSGP

Kathy,

Attached to this email is the last version of the permit that we received on May 4th. The short answer to your questions is "no" we are not o.k. with the current (May 4th) permit as we provided comments on May 15th that have not been addressed.

I sent comments to Yogesh with a cc to you on May 15th (email attached – tilted EPA comments on WVDEP MSGP) for the issues that remain, that must be addressed in order for us to concur. You and I discussed item 2 of the email. With respect to number 2, BPJ is the justification provided on the limits without data to support the limit. Not having data to support the limit creates a vulnerability for WVDEP. If additional time is needed to support the limits that we have identified, I am comfortable concurring on final drafts for this reissuance for the BPJ limits identified as they are; however, the next permit will need to include the supporting data.

The remaining comments from May 15th must be addressed. If your staff have any questions, or would like to speak directly with my Staff, they may contact Liz Ottinger for any clarification to move this draft permit and fact sheet to a final draft.

I have copied Yogesh and my team on this email. We remain ready to work with WVDEP to get the last remaining comments resolved so that WVDEP can move this permit to public notice and comment for those portions of the permit that have been modified.

Please feel free to contact me with any questions.

Sincerely,
Michelle

Michelle,

Are you satisfied with the latest version of the MSGP? My team is wanting to know before we send it back out to public comment.

Kathy
